

INDUSTRIES DEPARTMENT
GOVERNMENT OF MAHARASHTRA

1. INTRODUCTION

Considering Maharashtra's strengths in terms of human resources, connectivity and infrastructure, and the special significance of Information Technology (IT) for generating employment, increasing efficiency and improving the quality of life, the State Government announced its first IT Policy in 1998. It was followed by the IT and IT-Enabled Services (ITES) Policy in 2003 which provided comprehensive support for the further development of this sector in Maharashtra.

These Policies have been highly successful. Among other achievements, and in addition to the specialized infrastructure provided by public agencies such as MIDC and CIDCO, 369 private IT Parks are being established in Maharashtra. 55 of these Parks have already been set up, generating employment for 1.27 lakh persons. When they are completed, the remaining IT parks will provide more than 6.62 lakh new jobs. Since the 2003 Policy, IT exports from Maharashtra have increased by 135%, positioning Maharashtra among the top three States. The growth rate of FDI in the State's IT sector has been the highest in the country. Maharashtra is also a leader in the telecommunications sector, and is home to over 20% of the broadband subscribers in India.

The Government of Maharashtra now intends to consolidate and build upon the earlier initiatives through a new IT Policy. New strengths have developed in the State in fields such as Animation, Visual Effects and Gaming (AVGC) which can provide considerable value addition. Certain other areas such as IT hardware and Telecom manufacturing require further focused attention in order to strengthen synergies in the ICT sector. The new Policy addresses these areas.

According to the recent NASSCOM - AT Kearney report, 90% of the IT-BPO industry in India is concentrated in and around 7 cities in India, including Mumbai and Pune in Maharashtra. The report has identified Aurangabad, Nagpur and Nashik as the emerging new areas with high potential for the IT sector. The Government also intends to further promote its development across the State, and particularly in districts which

Maharashtra IT/ITES Policy-2009

are low in the Human Development Index (HDI) in the interest of balanced regional growth and to provide local skills and entrepreneurial talent with greater opportunities. For this purpose, the Policy provides additional benefits to IT units and infrastructure around cities with high potential as well as the most backward regions of Maharashtra, while continuing to support investment in the leading areas.

A large, trained workforce with enhanced skill levels is a sine qua non for the continued growth and value addition in the IT sector, and its spread to other areas in the State. The new Policy therefore places emphasis on innovative measures to promote capacity building, largely through public-private initiatives.

Maharashtra is the largest market for IT hardware and internet in India. IT continues to transform daily life for the better. It has become necessary to address the environmental consequences of the rapid increase in IT users. The Policy proposes path-breaking initiatives to promote 'green' IT and electronic hardware, as well as e-waste recycling.

2. IT & ITES POLICY 2009

1. Strategic Drivers of the Policy

IT and ITES Policy, 2003

**GOVERNMENT OF MAHARASHTRA
Industries, Energy & Labour Department,
Government Resolution No.ITP-2003/CR-3311/IND-7,
Mantralaya, Mumbai – 400 032.**

Dated :- 12.07.2003

1. Context:

Government of Maharashtra has been supporting development of industry and business through a series of far-reaching policy initiatives. The Information Technology industry has been an important thrust area and has been receiving government support. During the last five years, the Government focussed on HRD, IT related infrastructure, fiscal incentives to IT units, IT in Governance and Institutional Framework for the IT sector. These initiatives have enabled the IT industry in the State to establish an initial lead and a firm foundation for a quantum leap has been laid. Exports of software and ITES from the State presently account for about 20% share of the country's exports. These exports have registered an annual growth of more than 30% during the last four years. The whole State has been connected through an Optical Fibre Cable Network and a statewide network of competent training institutions has been established for building a pool of world-class IT professionals for providing strength and support to the IT industry in the State.

At this stage of growth of the IT industry in the State, new areas warranting State's policy support have surfaced. The State Government has identified and appreciated these emerging needs, requiring State support for facilitating growth of the diversified streams of the IT

industry in the near future. Through a consultative process involving prominent stakeholders of the IT industry, the Government has firmed up areas for further State support. Such a focussed support to different segments of the IT industry is to be implemented under the IT & ITES Policy, 2003.

2. **Objective:**

The main objective of the IT and ITES Policy, 2003 is to make Maharashtra the most favoured destination for investments in the IT and ITES industry. Banks, IT and ITES firms are not in a position to submit C-Form and hence they are required to pay higher rate of sales tax. The Government will attempt to get this procedure simplified, with the consent of the Government of India.
- (d) Presently, 14% Contract Tax is being charged on annual maintenance agreements for IT products. Since proportion of spare parts required for maintenance of such products is very small, a maximum of 5% works contract tax on annual maintenance agreements of IT and ITES units shall be charged in the State.

11. **Support to IT and ITES units by Urban Local Bodies:**

Rapid Growth of the IT and ITES industry in urban areas will benefit Urban Local Bodies in many ways. Therefore, the Government will endeavour to associate the Urban Local Bodies as partners with its efforts to support the IT and ITES units. In partnership with the ULBs, the following support will be made available to IT and ITES.

11.1 **Octroi / Entry Tax:**

- (a) To make IT and ITES units in Maharashtra competitive with similar units in other States, directions shall be issued to all the Municipal Corporations in the State for exemption in Octroi/Entry Tax to such units, on all capital goods and raw materials purchased by them. Such an exemption to IT and ITES units will also be granted by Municipal Corporations from any other alternative tax, if levied in place of Octroi.

- (b) Capital goods and raw materials imported within the municipal limits by IT and ITES units were exempted from Octroi by the BMC upto May, 2002. This exemption will be restored by the BMC for the IT and ITES units.
- (c) To attract and promote the IT and ITES units in Mumbai and other urban areas, the Government shall issue directions to all Municipal Corporations and Municipal Councils to levy property tax on all establishments/properties/buildings/premises of IT and ITES units on par with residential areas in their respective municipal limits.
- (d) 100% additional FSI shall be made available to all IT and ITES units in Public IT Parks in the State.
- (e) 100% additional FSI shall also be made available to all registered IT and ITES units located in Private IT Parks, approved by Directorate of Industries in the State. However, to avail of this additional 100% FSI, the private IT parks will have to comply with certain norms and terms. The Empowered Committee referred in Para-6 shall fix such necessary norms and terms, including the premium to be charged from the parks for eligibility of the parks for this. The Empowered Committee shall review such norms and terms of eligibility on a regular basis for ensuring proper utilization of the additional FSI.
- (f) Permission for erecting towers & antennae up to the height prescribed by the Civil Aviation Department shall be granted by the concerned Municipal bodies at the time and as part of approval of the building plan itself.
- (g) The Brihan-Mumbai Municipal Corporation (BMC) and MIDC shall expeditiously complete improvement work of approach roads leading to SEEPZ and Marol MIDC area from the Mumbai Airport.
- (h) To support rapid growth of the IT and ITES industry, roads connecting the IT Parks to main highways have to be of very high quality. Therefore, the roads connecting Private/Public IT Parks

to the main highways shall be transferred to the developers of Private and/ or Public IT parks for development by investing their own funds. To facilitate the developers to recover such an investment, future property tax accruals to the Municipal Corporation/Council on new properties in the IT parks would be adjusted against such investments. The Government shall issue necessary directions to all Municipal Corporations and Municipal Councils in this regard.

- (i) Various permissions, approvals and registrations to IT and ITES units required from the Municipal Corporations need to be issued expeditiously. To facilitate this, the Government shall issue directions to all the Municipal Corporations to implement a single window interface for expeditious processing of such permissions, approvals and registrations.

12. All Concerned Departments of the Government should expeditiously issue necessary Orders/Notifications as per the above mentioned Government decisions.

By order and in the name of the Governor of Maharashtra.
